

Member Contributions — Group 52 (Super Mario Game)

Course: CS202 - C++ Programming / Object-Oriented Design

Class: 25A01

Group: 52

This document is the same data as [Member_Contributions.xlsx](#) (the TA-facing spreadsheet, in the format used by the group's other CS202 project) rendered as Markdown/PDF for readability — both are generated from [scripts/build_contributions.py](#) (one source, one task table) so they cannot drift apart.

Summary

Number of students	2
Number of tasks	157
Number of task hours	321
Number of Git commits	480
Max student percentage	0.5
Project score	10

Git commit counts measured at 30f00d8 on 2026-09-02.

Do not edit the grey cells in the spreadsheet edition. TAs enter the score of all PAs in the project score and get the individual scores; students may enter an estimated project score to see how percentages affect it. **Percent** is set to 0.5/0.5 for both members — the raw Tasks/Hours/Git percentages below inform that judgment rather than dictate it, the same convention the reference spreadsheet uses.

No	Student ID	Full name	Tasks	Tasks %	Task Hours	Hours %	Git Commits	Git %	Percent	Score (Student)
1	25125083	Nguyễn Đình Minh Huy	112	71.3%	241	75.1%	419	87.3%	0.5	10
2	25125084	Trần Gia Huy	45	28.7%	80	24.9%	61	12.7%	0.5	10

Note on the gap between the Git % column and the Tasks/Hours % columns: Nguyễn Đình Minh Huy's git identity carries a large share of small fix/doc/log commits (419 of 480) accumulated across the whole session history, while task count and estimated hours — a better proxy for actual design/implementation effort — split closer to 71/29. Both are shown rather than only the more flattering one.

Task-by-task breakdown

A task should be done by only 1-2 students. Each member worked far more than the minimum 5 tasks the reference template asks for.

No	Student ID	Full name	Task Description	Hours	Evidence
1	25125083	Nguyễn Đình Minh Huy	Configured CMake (FetchContent) for SFML 3.0.2 + Dear ImGui/ImGui-SFML and set up the project directory structure	2	see docs/Group52_04/5 2.md
2	25125083	Nguyễn Đình Minh Huy	Drafted the v2.0 project spec (110 features), UML class diagrams and the implementation plan (TASKS.md, TASK_DIVISION.md)	3	see docs/Group52_04/5 2.md

No	Student ID	Full name	Task Description	Hours	Evidence
3	25125083	Nguyễn Đình Minh Huy	Wrote clean C++ base skeletons for managers, physics and entities	1.5	see docs/Group52_04/5 2.md
4	25125083	Nguyễn Đình Minh Huy	Implemented MathUtils (vector ops, clamp, interpolation helpers)	1	see docs/Group52_04/5 2.md
5	25125083	Nguyễn Đình Minh Huy	Built GameStateManager/IGameState state-stack pattern and the Game singleton main loop at a fixed 60Hz timestep	3	see docs/Group52_04/5 2.md
6	25125083	Nguyễn Đình Minh Huy	Implemented AABB collision primitives and a dynamic SpatialHash broadphase grid	2.5	see docs/Group52_04/5 2.md
7	25125083	Nguyễn Đình Minh Huy	Built the PhysicsEngine update pipeline (gravity, gravity zones/water viscosity, axis-separated tile resolution)	2.5	see docs/Group52_04/5 2.md
8	25125083	Nguyễn Đình Minh Huy	Implemented CollisionDetector/CollisionResolver (solid tiles, conveyors, stomps/damage, player-vs-player bounces)	3	see docs/Group52_04/5 2.md
9	25125083	Nguyễn Đình Minh Huy	Restructured Entity attributes to protected with friend-class access and read-only getters	1	see docs/Group52_04/5 2.md
10	25125083	Nguyễn Đình Minh Huy	Implemented the IPlayerState decorator pattern (StarDecorator, MegaDecorator) with timers	2	see docs/Group52_04/5 2.md
11	25125083	Nguyễn Đình Minh Huy	Coded concrete playable characters (Mario, Luigi, Toad, Peach) with custom physics/abilities	2.5	see docs/Group52_04/5 2.md
12	25125083	Nguyễn Đình Minh Huy	Built the Item base class and 12 concrete item subclasses (Mushroom, FireFlower, Coin, Star, etc.)	3	see docs/Group52_04/5 2.md
13	25125084	Trần Gia Huy	Built InputManager (Command Pattern) with dual-player key mapping (P1 WASD/Space/F, P2 Arrows/M)	2	see docs/Group52_04/5 2.md
14	25125084	Trần Gia Huy	Implemented SoundManager (Singleton) with music/SFX channels, WAV/OGG loading	1.5	see docs/Group52_04/5 2.md
15	25125084	Trần Gia Huy	Researched/designed the IMovementStrategy interface and 8 enemy AI strategies	2	see docs/Group52_04/5 2.md
16	25125084	Trần Gia Huy	Prepared abstract skeletons for the Enemy and Block type hierarchies	1	see docs/Group52_04/5 2.md
17	25125084	Trần Gia Huy	Designed the EntityFactory registry blueprint for JSON-driven instantiation	1	see docs/Group52_04/5 2.md
18	25125083	Nguyễn Đình Minh Huy	Implemented the full Camera class (LERP tracking, screen shake, viewport clamping)	2	see docs/Group52_05/5 2.md
19	25125083	Nguyễn Đình Minh Huy	Refactored move/run commands to intent flags on Character/Player instead of direct velocity changes	1.5	see docs/Group52_05/5 2.md
20	25125083	Nguyễn Đình Minh Huy	Centralized friction/acceleration/run-speed logic into PhysicsEngine::update() with surface-specific properties	2	see docs/Group52_05/5 2.md
21	25125083	Nguyễn Đình Minh Huy	Integrated Camera into PlayingState with dual-view (world vs HUD) rendering	1.5	see docs/Group52_05/5 2.md
22	25125083	Nguyễn Đình Minh Huy	Added mid-air wall-slide friction with a capped slide speed (WALL_SLIDE_SPEED)	1.5	see docs/Group52_05/5 2.md
23	25125083	Nguyễn Đình Minh Huy	Integrated nlohmann/json and built LevelLoader to parse tile/entity/spawn data from level JSON	2.5	see docs/Group52_05/5 2.md
24	25125083	Nguyễn Đình Minh Huy	Authored 4 level files (level_1..3, bonus_1) and an ImGui level selector for playtesting	2	see docs/Group52_05/5 2.md
25	25125084	Trần Gia Huy	Implemented IMovementStrategy and 8 concrete AI strategies (Patrol, Chase, Fly, etc.)	2.5	see docs/Group52_05/5 2.md
26	25125084	Trần Gia Huy	Coded the Enemy base class plus Goomba, KoopaTroopa, KoopaParatroopa, Boo	3	see docs/Group52_05/5 2.md
27	25125084	Trần Gia Huy	Coded the Block base class plus BrickBlock, QuestionBlock, Pipe, Flagpole	2.5	see docs/Group52_05/5 2.md
28	25125084	Trần Gia Huy	Coded 7 advanced v2.0 enemies (PiranhaPlant, BulletBill, HammerBro, Thwomp, ChainChomp, Lakitu, Spiny)	3.5	see docs/Group52_05/5 2.md

No	Student ID	Full name	Task Description	Hours	Evidence
29	25125084	Trần Gia Huy	Coded 5 advanced v2.0 blocks (HiddenBlock, MovingPlatform, FallingPlatform, IceBlock, ConveyorBelt)	2.5	see docs/Group52_05/5 2.md
30	25125084	Trần Gia Huy	Implemented EntityFactory to instantiate 25+ entity types from JSON	2.5	see docs/Group52_05/5 2.md
31	25125084	Trần Gia Huy	Built SpriteSheet, Animation (flyweight) and AnimationManager/Animator	3	see docs/Group52_05/5 2.md
32	25125084	Trần Gia Huy	Wrote verify_enemies_new.cpp / verify_blocks_new.cpp test harnesses	1.5	see docs/Group52_05/5 2.md
33	25125083	Nguyễn Đình Minh Huy	Built Serializer for save-slot JSON schemas (character, player state, scores, checkpoints, playtime)	2.5	see docs/Group52_06/5 2.md
34	25125083	Nguyễn Đình Minh Huy	Implemented StatisticsTracker (EventBus subscriber for coins/enemies/deaths/combo/splaytime)	1.5	see docs/Group52_06/5 2.md
35	25125083	Nguyễn Đình Minh Huy	Implemented AchievementManager (10 achievements) plus a slide-in/out toast HUD	2	see docs/Group52_06/5 2.md
36	25125083	Nguyễn Đình Minh Huy	Built the ImGui Pause/Settings panel (save slots, volume, keybindings, difficulty, auto-save)	2	see docs/Group52_06/5 2.md
37	25125083	Nguyễn Đình Minh Huy	Wrote the verify_save_load.cpp integration test suite	1	see docs/Group52_06/5 2.md
38	25125083	Nguyễn Đình Minh Huy	Implemented the Undo/Redo command framework (EditorCommands)	2	see docs/Group52_06/5 2.md
39	25125083	Nguyễn Đình Minh Huy	Built the MapEditor viewport dashboard (tile/entity brushes, undo/redo, save)	2	see docs/Group52_06/5 2.md
40	25125083	Nguyễn Đình Minh Huy	Implemented pixel-to-grid coordinate mapping and grid-line rendering	1.5	see docs/Group52_06/5 2.md
41	25125083	Nguyễn Đình Minh Huy	Centralized duplicate tile/entity name mappers into SerializationUtils	1	see docs/Group52_06/5 2.md
42	25125083	Nguyễn Đình Minh Huy	Wrote the verify_map_editor.cpp test harness	1	see docs/Group52_06/5 2.md
43	25125084	Trần Gia Huy	Participated in architectural reviews, resolved cross-branch merge conflicts, refined achievement SFX triggers	1	see docs/Group52_06/5 2.md
44	25125083	Nguyễn Đình Minh Huy	Merged A/feature/save-load and A/feature/level-editor; addressed PR review fixes (EventBus sentinel, debug key remap, Game keybinding encapsulation)	2	see docs/Group52_07/5 2.md
45	25125083	Nguyễn Đình Minh Huy	Fixed a stale achievement-toast bug on slot reload; aligned achievement keys with SPEC.md	1	see docs/Group52_07/5 2.md
46	25125083	Nguyễn Đình Minh Huy	Built the consolidated verify_all.cpp test runner combining 6 test suites; updated CMakeLists.txt	2	see docs/Group52_07/5 2.md
47	25125083	Nguyễn Đình Minh Huy	Authored two_player_ai_plan.md (2-player + Shadow Mario architecture design doc)	2.5	see docs/Group52_07/5 2.md
48	25125083	Nguyễn Đình Minh Huy	Ran an interactive binary demo to validate save/load and level-editor integration	1	see docs/Group52_07/5 2.md
49	25125084	Trần Gia Huy	Entity Factory & concrete entities merged into dev (integration of prior work)	0.5	see docs/Group52_07/5 2.md
50	25125084	Trần Gia Huy	Enemy hierarchy + AI strategies merged into dev (integration of prior work)	0.5	see docs/Group52_07/5 2.md
51	25125084	Trần Gia Huy	Blocks/platforms merged into dev (integration of prior work)	0.5	see docs/Group52_07/5 2.md
52	25125084	Trần Gia Huy	Built Hud (lives/score/coins/time/stage) plus a boss health bar and retro typography (PressStart2P/SuperMario256 fonts)	2	see docs/Group52_07/5 2.md
53	25125084	Trần Gia Huy	Finalized SpriteSheet/AnimationManager/Animator; added verify_blocks/verify_enemies/verify_graphics/verify_graphics_visual/verify_hud_boss test targets	1.5	see docs/Group52_07/5 2.md

No	Student ID	Full name	Task Description	Hours	Evidence
54	25125084	Trần Gia Huy	Consolidated duplicate asset/ and assets/ folders into one assets/ root	0.5	see docs/Group52_07/5 2.md
55	25125084	Trần Gia Huy	Built the Minimap component (scaled tilemap preview, camera frustum, player tracking dot)	2	Git commit cb6eab2
56	25125084	Trần Gia Huy	Wrote the verify_minimap_visual.cpp test target	1	see docs/Group52_07/5 2.md
57	25125083	Nguyễn Đình Minh Huy	Reviewed/validated the ParticleSystem/ObjectPool design (O(1) acquire/release, zero-allocation)	1	see docs/Group52_08/5 2.md
58	25125083	Nguyễn Đình Minh Huy	Updated TASKS.md through Phase 8 and Bonus A, cross-referenced against TASK_DIVISION.md	0.5	see docs/Group52_08/5 2.md
59	25125083	Nguyễn Đình Minh Huy	Ran git fetch --all, verified dev in sync with origin/dev, tracked branch status	0.5	see docs/Group52_08/5 2.md
60	25125084	Trần Gia Huy	Implemented ParticleSystem with ObjectPool (burst/continuous emission modes)	2.5	Git commit 7a6f62b
61	25125084	Trần Gia Huy	Tuned particle parameters (alpha fade, emission rate, spread angle)	1.5	Git commits c7d4fd4, 6 2c78ef
62	25125084	Trần Gia Huy	Built the verify_particles_visual interactive test target	1	see docs/Group52_08/5 2.md
63	25125084	Trần Gia Huy	Extracted the player sprite sheet player.json (92 animation frames: idle/walk/run/jump/etc.)	3	Git commits d6bd07d, 0 be4508, 9403be5
64	25125084	Trần Gia Huy	Built the verify_player_animation_visual test target	1	see docs/Group52_08/5 2.md
65	25125084	Trần Gia Huy	Began sprite naming standardization / asset pipeline scripts	1	Git commit 15327b4
66	25125084	Trần Gia Huy	Enhanced random-number generation with std::uniform_real_distribution for particle spread	0.5	Git commit 9bb9d16
67	25125083	Nguyễn Đình Minh Huy	Implemented the Fireball entity + ObjectPool, EntityFactory/EventBus wiring, verify_fireball.cpp (4/4 pass)	3	see docs/Group52_09/5 2.md
68	25125083	Nguyễn Đình Minh Huy	Enhanced Flagpole with height-scaled scoring, animation and a LevelComplete event; verify_flagpole_trampoline.cpp	2	see docs/Group52_09/5 2.md
69	25125083	Nguyễn Đình Minh Huy	Enhanced Trampoline bounce mechanics (spring compression, configurable impulse)	1.5	see docs/Group52_09/5 2.md
70	25125083	Nguyễn Đình Minh Huy	Built the CheckpointFlag entity (visual states, auto-save, CheckpointActivated event, respawn coordinates)	2	see docs/Group52_09/5 2.md
71	25125083	Nguyễn Đình Minh Huy	Implemented the Memento pattern: GameSnapshot + TimeRewindManager (300-frame circular buffer); verify_memento_rewind.cpp (4/4 pass)	3.5	see docs/Group52_09/5 2.md
72	25125083	Nguyễn Đình Minh Huy	Built MapGenerator for procedural level generation; verify_map_generator.cpp	3	see docs/Group52_09/5 2.md
73	25125083	Nguyễn Đình Minh Huy	Implemented the dual bounding-box architecture (physicsBox/combatBox) across Entity/CollisionDetector/CollisionResolver	2.5	see docs/Group52_09/5 2.md
74	25125083	Nguyễn Đình Minh Huy	Added void-fall death detection in PlayingState	1	see docs/Group52_09/5 2.md
75	25125083	Nguyễn Đình Minh Huy	Added brick/question-block head-butt reactions in PhysicsEngine	1.5	see docs/Group52_09/5 2.md
76	25125083	Nguyễn Đình Minh Huy	Removed public setLives/setCoins/setScore from Player; added friend class PlayingState	0.5	see docs/Group52_09/5 2.md
77	25125083	Nguyễn Đình Minh Huy	Added Camera::move() for editor WASD/arrow panning	1	see docs/Group52_09/5 2.md
78	25125083	Nguyễn Đình Minh Huy	Added a Level Editor Mode (F1) button to MenuState	0.5	see docs/Group52_09/5 2.md
79	25125083	Nguyễn Đình Minh Huy	Hardened Game::shutdown() to pop all game states before manager teardown	1	see docs/Group52_09/5 2.md

No	Student ID	Full name	Task Description	Hours	Evidence
80	25125083	Nguyễn Đình Minh Huy	Added multi-path font-loading fallback candidates in PlayingState	0.5	see docs/Group52_09/5 2.md
81	25125083	Nguyễn Đình Minh Huy	Fetched/merged origin/B/feature/graphic-visual into dev; resolved font-loading + agent_history.log conflicts; pushed dev	1	Git commit 17cef23
82	25125083	Nguyễn Đình Minh Huy	Fixed non-solid TileType::Coin tiles not being collected on walk-through	1	Git commit d12e763
83	25125083	Nguyễn Đình Minh Huy	Deduplicated a ResourceManager missing-SoundBuffer warning spam	0.5	see docs/Group52_09/5 2.md
84	25125084	Trần Gia Huy	Built a spritesheet-merging tool; updated enemy_projectile/item/world_scenery_item atlases	3	Git commits 044a5d8, 80c048e, b90a899
85	25125084	Trần Gia Huy	Cleaned sprite/atlas coordinates affected by the merge	1	Git commit 10828a7
86	25125084	Trần Gia Huy	Updated SPRITE_NAMING_CONVENTIONS.md (frame inventories, naming standards)	1	see docs/Group52_09/5 2.md
87	25125084	Trần Gia Huy	Built SpriteColorFilter (HSL->RGB, 12Hz Star Power cycling, 15Hz hurt flicker, hit-flash tint)	2	Git commit 2c3bb83
88	25125084	Trần Gia Huy	Built SpriteTransformAnim (scale-lerp easing, 720 deg/s spin, 12Hz Mega/Mini flicker)	2	Git commit 2c3bb83
89	25125084	Trần Gia Huy	Built the EntityDeathEffect singleton (EnemyFlip, StarKillSpin, PlayerDeathHop)	2	Git commit 2c3bb83
90	25125084	Trần Gia Huy	Added a SoundManager synthesized fallback beep buffer	1	see docs/Group52_09/5 2.md
91	25125084	Trần Gia Huy	Upgraded verify_graphics_visual with a Transform/Color-Filter FX ImGui tab	1.5	see docs/Group52_09/5 2.md
92	25125083	Nguyễn Đình Minh Huy	Refined MapGenerator (elevation profiles, biome ceilings, lava pits, jump-reachability-guarded platforms, 3 Star Coins, threat-pacing curve) + ImGui tuning panel	3.5	see docs/Group52_10/5 2.md
93	25125083	Nguyễn Đình Minh Huy	Built the 3-world campaign + warp-pipe system; generate_game_levels.cpp synthesizing 7 level JSONs; extended SerializationUtils/LevelLoader for warp metadata; seamless sub-level transitions	4	see docs/Group52_10/5 2.md
94	25125083	Nguyễn Đình Minh Huy	Added ImGui campaign navigation dropdowns and an Active Level Tube warp selector	1.5	see docs/Group52_10/5 2.md
95	25125083	Nguyễn Đình Minh Huy	Fixed a static-block gravity bug (getGravityMultiplier() override); added item resting-state physics (resolveItemVsBlock)	1.5	see docs/Group52_10/5 2.md
96	25125083	Nguyễn Đình Minh Huy	Optimized player hitbox dimensions (32px to 24px width tiers); refined stomp-vs-side-hit combat resolution	2	see docs/Group52_10/5 2.md
97	25125083	Nguyễn Đình Minh Huy	Fixed the LevelLoader ifstream failbit cascade (file.clear()); expanded fallback search paths	1.5	see docs/Group52_10/5 2.md
98	25125083	Nguyễn Đình Minh Huy	Fixed a SIGABRT shutdown crash (explicit m_window.close()) and hardened GameStateManager transitions	1.5	see docs/Group52_10/5 2.md
99	25125084	Trần Gia Huy	Wired sprite animations across all entities; aspect-ratio scaling for HUD/items; POW 8-frame shockwave; trampoline/PSwitch visual states	3.5	Git commits 069817b, 0bc21c3, 2d5058e, 83660b5, 065557d, 61e30bc
100	25125084	Trần Gia Huy	Built the Web Metadata Editor Studio (metadata_editor.html, edit_sprite_metadata.py) with cursor-anchored zoom, position-finder HUD, drag-to-draw frames, TexturePacker-compatible export	2.5	see docs/Group52_10/5 2.md
101	25125084	Trần Gia Huy	Integrated sprite HUD assets (animated coin counter, Star Coin indicators, character-specific lives icon)	1.5	see docs/Group52_10/5 2.md
102	25125084	Trần Gia Huy	Built PipeRenderer (2-block-wide AABB, directional multi-part pipe head/body rendering)	1.5	Git commit a0f1a3b
103	25125084	Trần Gia Huy	Wired game-wide SFX/BGM into SoundManager (jump, stomp, coin, break, power-up/down, boing, stage-clear, game-over) + fallback buffer	2.5	Git commits 1002595, c383c19, 9976209

No	Student ID	Full name	Task Description	Hours	Evidence
104	25125084	Trần Gia Huy	Tuned all 11 enemy AI state machines (Thwomp slam cycle, Boo gaze-detection, HammerBro parabolic throw, Koopa shell physics)	3	Git commit d954a66
105	25125084	Trần Gia Huy	Built verify_enemies_behavior.cpp + enhanced verify_enemies_visual.cpp (11 isolated test rooms)	1.5	Git commit d954a66
106	25125083	Nguyễn Đình Minh Huy	Resolved the Level 1-3 crash on Bowser's first fireball (mid-frame entity-spawn vector reallocation); rebuilt and playtested on Windows	3	see logs/agent_history.log 2026-08-16/22
107	25125083	Nguyễn Đình Minh Huy	Fixed 12 defects from a playtest pass plus two menus that overflowed	2	Git commit f6fc8bc
108	25125083	Nguyễn Đình Minh Huy	Fixed CMakeLists naming src/Graphics/HUD.cpp when the file is Hud.cpp	0.5	Git commit 03bf828
109	25125083	Nguyễn Đình Minh Huy	Fixed the player being unable to jump while walking into a wall	1	Git commit 60cc735
110	25125083	Nguyễn Đình Minh Huy	Fixed 28 files using std:: symbols without including their header	1	Git commit 4ac8a1c
111	25125083	Nguyễn Đình Minh Huy	Fixed CI building only 2 of the 13 binaries it then tested	1	Git commit 8141120
112	25125083	Nguyễn Đình Minh Huy	Fixed 4 test harnesses opening an sf::RenderWindow on a CI runner with no display	1	Git commit 33d5aae
113	25125083	Nguyễn Đình Minh Huy	Fixed three defects the screenshots showed that the tests did not (backdrop ground line, hill-bottom offset, a Player 2 HUD badge overwriting the world field)	2	Git commit da8ca99
114	25125083	Nguyễn Đình Minh Huy	Sealed test hermeticity: Serializer::setSaveDirectory() + TestSaveSandbox.hpp so all 23 verify_* harnesses point at a fresh temp directory	2.5	Git commit 045f9b7
115	25125083	Nguyễn Đình Minh Huy	Generated real UML class diagrams from the headers (tools/gen_class_diagram.py) and wrote the CS202 final report's first edition (15 sections, generated by build_report.py)	4	Git commits a0395d6, 3c0a768, 64088b4
116	25125083	Nguyễn Đình Minh Huy	Produced a LaTeX/PDF edition of the report in the HCMUS template and deepened it (implementation section 3->11 subsections, technical-problems section rebuilt into 8 themed groups)	4	Git commits fdec9cc, 730336c
117	25125083	Nguyễn Đình Minh Huy	Diagnosed and fixed three defects reported from a real playthrough: the end-of-level castle's buffer margin, Boom Boom's arena overlapping the 1-2 flagpole, and the camera/z-order bug carried into 1-3; added regression tests for all three	4	this session, branch A/fix/level-completion-and-camera-defects
118	25125083	Nguyễn Đình Minh Huy	Implemented Endless Mode (chunked infinite level generation with rising difficulty, distance-based scoring) and a real solvability oracle for MapGenerator, after evaluating (and rejecting the framework of) the abandoned A/mapgen-gan-plan and A/rl-neural-policy side branches for anything worth porting	5	this session, branch A/feature/endless-mode-and-solvability
119	25125083	Nguyễn Đình Minh Huy	Rebuilt the submission package: a 97-feature list and per-member manual test checklist grounded in a fresh source-code audit, the Member Contributions spreadsheet (matching the DesignPatternsGroup52 format), and an expanded report (OOP/pattern rationale, two new UML diagrams)	4	this session, branch A/docs/submission-package-update
120	25125084	Trần Gia Huy	Resolved merge conflicts while pulling the latest changes and merged into main	2	Git commits 72b13c6, a522007, 75e9cbb
121	25125083	Nguyễn Đình Minh Huy	Merged all outstanding work to dev/main and generated the initial submission package (AI Usage Declaration, features list, task division, demo-video placeholder, member contributions, final report) while kicking off the defect-auditing test suite.	3	see logs/agent_history.log 2026-08-30, branch main
122	25125083	Nguyễn Đình Minh Huy	Merged the level-completion, endless-mode, and submission-package branches into dev then main and pushed; corrected the AI Usage Declaration's tool attribution (Antigravity vs. Claude Code) per user feedback.	1	see logs/agent_history.log 2026-08-31 09:45 and 10:00, branch main

No	Student ID	Full name	Task Description	Hours	Evidence
123	25125083	Nguyễn Đình Minh Huy	Replaced the report's ASCII architecture diagram with a real figure, embedded full-depth UML diagrams in the appendix, and rewrote the class-diagram generator to render every attribute/method with UML visibility notation, fixing a brace-init parsing bug along the way.	3.5	branches A/docs/report-architecture-figure-and-full-uml, A/docs/tailed-uml-full-attributes-methods
124	25125083	Nguyễn Đình Minh Huy	Ran a three-way SPEC/code/report audit via three parallel subagent passes, producing a 15-defect, 14-task (R1-R14) remediation plan and correcting nine stale claims in the features list and report.	4	branch A/docs/spec-feature-audit
125	25125083	Nguyễn Đình Minh Huy	Small-defect and hygiene batch (R1/R2/R3/R6): fixed SoundManager's level-BGM index mapping, Enemy/Spiny's screen-height despawn bug, and unsurfaced solvability results; deleted the dead AnimationManager class; degraded audio startup gracefully with no device; untracked .member_profile.json and added SPEC's descope addendum.	3.5	see logs/agent_history.log 2026-08-31 11:48-12:34
126	25125083	Nguyễn Đình Minh Huy	Migrated every raw EventBus SubscriptionId to ScopedSubscription across PlayingState/AchievementManager/StatisticsTracker/Camera (R4), and fixed a real static-destruction-order SIGSEGV the migration surfaced.	2.5	branch A/fix/scoped-subscription-adoption, commit 00c08f8
127	25125083	Nguyễn Đình Minh Huy	Fixed a P-Switch soft-lock caused by mis-themed sub-level floors, a half-rendered single-column pipe in all three sub-levels, and made the overworld QuestionBlock's sprite reflect its emptied state to match SPEC (R16).	3	branch A/fix/sublevel-tile-batch, commit cc6a32d
128	25125083	Nguyễn Đình Minh Huy	Investigated reported 'Bowser never spawns' and 'flag reachable mid-fight' defects (both refuted as already fixed/non-reproducing) and widened Boom Boom's arena from 3.5 to 12.5 tiles of pacing room by removing decorative staircase tiles (R15).	2.5	branch A/fix/boss-encoder-batch, commit 56c8db7
129	25125083	Nguyễn Đình Minh Huy	Fixed the end-game audio batch: castle_complete fanfare being clobbered by level_complete on boss levels via a deferred one-shot-music swap; investigated and struck two further audio defects as not reproducible/already fixed (R19).	2	branch A/fix/endgame-audio-batch, commit de52042
130	25125083	Nguyễn Đình Minh Huy	Reconciled the SPEC-audit document's defect ledger against shipped code, marking or striking about twenty defects and phases (R1-R19) and documenting four previously mis-recorded playtest defects.	1	branch A/docs/audit-status-reconciliation, commit cc08fc3
131	25125083	Nguyễn Đình Minh Huy	Fixed the Star power's missing rainbow-tint visual, the sub-level Piranha Plant's pipe-centering offset, and the fireball-kill flip-death sprite anchor via a shared Entity::drawSprite fix reaching every flip-killable enemy (R17).	2.5	branch A/fix/player-enemy-visual-batch, commit 4550bfe
132	25125083	Nguyễn Đình Minh Huy	Eliminated all 28 real dynamic_casts from CollisionResolver/PhysicsEngine via new virtual Entity/Item/Block/Enemy/Character hooks (nine commits, one dispatch family each), adding 26 regression checks and discovering that Release's -DNDEBUG compiled away nearly all existing assert()-based coverage (R5).	4	branch A/refactor/collision-dispatch, commit 4b87e0d
133	25125083	Nguyễn Đình Minh Huy	Placed all six previously-unused enemy types (KoopasParatroopa, Boo, BulletBill, Thwomp, ChainChomp, Lakitu) and hidden blocks across the campaign, fixed the secret_finder achievement's wrong trigger condition, and fixed two playtest-found defects in Bullet Bill and Lakitu placement (R9).	4	branch A/feature/campaign-population-pass, commit 4d6be7e
134	25125083	Nguyễn Đình Minh Huy	Stripped -DNDEBUG from ctest targets only (fixing vacuously-passing assert-based harnesses), refactored the build to compile app sources once via two CMake OBJECT libraries, and added a mutation-tested guard against tests writing into the real saves/directory (R11).	4	branches A/fix/tests-honour-assertions, A/build/object-library, A/fix/hermetic-tests

No	Student ID	Full name	Task Description	Hours	Evidence
135	25125083	Nguyễn Đình Minh Huy	Wired eight dormant systems into real gameplay: star-power side-touch kills, four unused particle types, surface-dependent footsteps, combo-hit pitch escalation, menu-row navigation SFX, a single-player camera clamp, and debug-console tab-completion (R7).	3	branch A/feature/wire-dormant-vfx-sfx, commit 7d94fb9
136	25125083	Nguyễn Đình Minh Huy	Added a keyboard-navigable LOAD GAME menu with a 3-slot picker showing character/level/score/time previews, reusing PlayingState's existing loadFromSlot path (R8).	2.5	branch A/feature/load-game-menu, commit d6672b7
137	25125083	Nguyễn Đình Minh Huy	Implemented main-menu Attract Mode (30s idle triggers a bundled demo replay, dismissed by any key), fixing two latent ReplayRecorder playback-pacing/fade-in bugs surfaced by actually watching it run (R10).	3	branch A/feature/attract-mode, commit 6075c27
138	25125083	Nguyễn Đình Minh Huy	Ran a full scripted playtest evidence pass across campaign completion, P-Switch/POW/axe, 2P versus death, difficulty modes, key rebinding, and FPS, discovering two new defects: boss destroyed by the respawn-safety sweep, and Load Game always resuming World 1-1 (R12).	3	branch A/verify/full-playtest-pass
139	25125083	Nguyễn Đình Minh Huy	Fixed the boss-survives-respawn defect (D29), Load Game restoring the saved level (D30), and re-implemented a double-exit guard for PlayingState, each with a mutation-tested regression case; merged and independently re-verified into dev (R20).	3	branch A/fix/remaining-defects-d29-d30-exit, commit 6e4868d
140	25125083	Nguyễn Đình Minh Huy	Root-caused and fixed a user-reported bug where Bowser fell out of the world through his own bridge/lava floor, since the void-plane check only covered players; added an Entity::onLeftLevel virtual hook.	2	branch A/fix/boss-falls-out-of-world, commit 95521a8
141	25125083	Nguyễn Đình Minh Huy	Fixed ten gameplay/visual issues in one pass: castle sprite/position, level-clear music timing, Star invincibility flicker, Piranha Plant centering, fireball flip pivot, Bowser arena verification, bonus-level plateau/castle seating, and Peach's Space-key float.	3	see logs/agent_history.log 2026-09-01 15:31 and 16:52, branch dev
142	25125083	Nguyễn Đình Minh Huy	Fixed sub-level pipe teleports and half-sprite rendering, decoupled the S key from ground-pound (crouch-only), halved Thwomp slam speed with a narrowed detection column, rewrote Chain Chomp's tethered-chase AI, enclosed the 1-3 bridge with walls, and fixed the camera snap on Bowser's defeat.	3	see logs/agent_history.log 2026-09-01 17:55, branch dev
143	25125083	Nguyễn Đình Minh Huy	Wrote the demo-video-requirements checklist; fixed the M-key minimap toggle, a duplicate player-death animation, metal-footstep SFX volume, and further tuned Thwomp slam/recovery speed and its 1-3 placement.	1.5	see logs/agent_history.log 2026-09-01 23:30, branch dev
144	25125083	Nguyễn Đình Minh Huy	R21 Phase 1 defect batch: fixed twelve release defects in one pass — a duplicate untracked asset tree causing level-data drift, half/warped pipe rendering, spawns embedded in solid tiles, an incomplete castle slab, double-integrated moving platforms, menu text overflow, duplicate achievement toasts, and gated debug ImGui off by default.	4	branch A/release/defect-batch-r21, commit 171a5b3
145	25125083	Nguyễn Đình Minh Huy	Merged the R21 batch and completed Phases 2-4: built a real GUI level editor wired to EntityFactory (fixing 24 of 40 silently-broken palette buttons), debug/recording cheats with a void-rescuing Immortal mode, fixed far-chunk procedural entities teleporting back to chunk-local coordinates, an explicit entity-type registry, and Bonus D's dynamic day/night lighting via a real GLSL shader.	4.5	commit 97fc43a (merge into dev), branch A/release/defect-batch-r21
146	25125083	Nguyễn Đình Minh Huy	Second user-reported defect wave: fixed warp-pipe hitbox/art and entry-mode rendering, Bowser's fireball stagger triple-counting a single fireball as three hits, Bowser falling into lava, Lakitu dropping a Fire Flower to keep the fight winnable, the 2P camera freezing on the eliminated player instead of following the survivor, and added save-slot choice/delete.	3.5	commit e97b7da (merge), branch A/fix/versus-camera-and-axes

No	Student ID	Full name	Task Description	Hours	Evidence
147	25125083	Nguyễn Đình Minh Huy	Audited OOP/SOLID adherence and design-pattern fidelity across the codebase (dynamic_cast counts, singleton count, friend-class audit, PDF text-overlap root cause) and authored the phased submission-sweep plan with per-lane dependencies, models, and effort levels.	3	docs/issues/submission_sweep_plan_2026-09-02.md, branch dev
148	25125083	Nguyễn Đình Minh Huy	Ran the submission-sweep Phase 0 baseline: clean rebuild, full ctest/regression run, a live smoke-test launch, and confirmed the LevelSolvability fix, with no code changes.	1	see logs/agent_history.log 2026-09-02 18:58, branch dev
149	25125083	Nguyễn Đình Minh Huy	Wrote the W11, W12, and W13 weekly reports from git log and agent-history evidence, including tracing the World 1-3 mid-frame entity-spawn crash's root cause for W11.	3	branches A/docs/weekly-w11, A/docs/weekly-w12-w13
150	25125083	Nguyễn Đình Minh Huy	Archived 20+ stale root/docs artifacts to docs/archive/, untracked stale saves/PDFs/zips, then reverted an AGENTS.md edit that had landed inside AgentHub's generated block and routed the rule change upstream instead.	2	branch A/chore/archive-2026-09-02, commit 9b83c9a
151	25125083	Nguyễn Đình Minh Huy	Extended the AI Usage Declaration to cover the full R1-R21 remediation plan, then corrected its date range and removed an unverifiable test-count claim per review.	1	branch A/docs/ai-declaration, commit 96560bd
152	25125083	Nguyễn Đình Minh Huy	Captured fresh gameplay screenshots and composited three YouTube thumbnail candidates, then narrowed to one final crop-and-zoom version after review found Mario illegibly small at native resolution.	1.5	branch A/docs/video-thumbnail
153	25125083	Nguyễn Đình Minh Huy	Fixed the report PDF's overlapping-table-text defect with content-aware column sizing, added a build.sh Overfull-hbox guard, and split two illegible full-detail UML pages into landscape multi-page spreads.	2.5	branch A/docs/report-layout, commit 0f3e5ea
154	25125083	Nguyễn Đình Minh Huy	Fixed the level editor's F5 playtest routing to Game Over/main menu instead of popping back to the editor on death, with a mutation-tested regression case.	1.5	branch A/fix/editor-playtest-gameover, commit 2bd2f80
155	25125083	Nguyễn Đình Minh Huy	Fixed MapGenerator's procedurally-generated vault exit pipe defaulting to the wrong entry mode; investigated the reported 'unreachable third Hard-mode axe' and found it does not reproduce, shipping a protective regression guard instead of an unjustified data edit.	1.5	branch A/fix/hard-axe-and-vault-pipe
156	25125083	Nguyễn Đình Minh Huy	Added a camera-distance gate on Endless Mode's ever-growing entity list, added ImGui sliders for the dynamic-lighting tunables, and deleted the dead UiRenderer::wrapText function.	2	branch A/fix/endless-gate-lighting-sliders-wrap-text, commit 0fe7138
157	25125083	Nguyễn Đình Minh Huy	Fixed MovingPlatform never advancing its own animation, flipped Spiny's default to spawn as an unhatched egg matching SPEC, and added a hardened post-condition regression test after review found the original test too weak.	2	branch A/fix/moving-platform-and-spiny-egg, commit cf195cb
